

FEATURED TRACTORS

**STRONGER EQUIPMENT.
LOCAL SERVICE. PROVEN
QUALITY.**

Power your work with confidence and precision from North Country Maple Sales & Services LLC, your authorized TMM tractor dealer serving the North Country and beyond. Whether you're managing a farm, maintaining your property, or tackling tough year-round projects, our lineup of TMM tractors delivers the performance, confidence, and reliability you can count on.

As a family business built on generations of craftsmanship, integrity, and hard work, we know what quality looks like — because we've been "Tapping Into Quality" since 1988. From our beginnings in maple tapping to our growing selection of TMM tractors, Amsoil products, and maple equipment, we're committed to helping our customers get the job done right.

If you're looking for additional pages or a more complex, feature-rich website, we can help.

FREQUENTLY ASKED QUESTIONS

Q. What is included in the website build?

A. The website build includes the initial page designs, website hosting, domain registration, and full set-up to get your site live and running smoothly. The specific services and features included in the website designs are detailed on the front of this flyer for your reference.

Q. What platform are the websites built in?

A. The websites are built using WordPress, one of the most popular and versatile website platforms available. It's a powerful, user-friendly, and highly customizable system that makes it easy to manage your content, update pages, and add new features as your business grows. WordPress is also SEO-friendly, mobile-responsive, and supported by a vast library of plugins, giving you the flexibility to create a website that's both professional and scalable.

Q. How long is the length of the contract?

A. The initial contract is for 12 months at the corresponding package price. At the end of the 12 months, you have two options:

1. Continue month-to-month at the same rate, which includes the retainer service hours each month.
2. Convert to standard hosting for \$600 per year. Nothing changes with your website — the only difference is that service hours are no longer included.

If you choose standard hosting and later need updates, edits, or site changes, those will be billed separately on an as-needed basis. This gives you flexibility to manage costs while keeping full control of your website.

Q. How long does it take to build a website from start to launch?

A. The initial build typically takes about 4 weeks from start to launch. However, this timeline can vary depending on the complexity of the website and the availability of resources such as images, content, and other required materials. Providing all necessary assets upfront can help ensure a smooth and timely launch.

Q. How will you handle payments?

A. We will set up an ACH payment so that on a certain date every month, the payments are automatically drafted or we will bill you for your portion of the coop.
